## **DETAILED ACTION**

### ***Request for Continued Examination***

1. The request filed on 7/28/06 for a Request for Continued Examination (RCE) based on parent Application No. 09/858,376 is acceptable and an RCE has been established. An action on the RCE follows.
2. Applicant's reply of 7-28-06 has been considered, but is not convincing. Applicant argues that Waytena et al ('770) does not have "software operable to select" but has only a manual step of selection. The examiner disagrees, Waytena et al ('770) at column 14, lines 13-35 discloses that if desired, the patron may be presented with a list of attractions that match preferences, which is seen to meet the language of applicant's selecting step.
3. Applicant's amendment was non-compliant with regard to the withdrawal of non-selected claims and the status indicators as such. As applicant is pro-se, and the response appears to be bona fide, a notice of non-compliant amendment was not issued, but the non-selected claims have been withdrawn from consideration and are required to be cancelled in response to this action.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 58 is rejected under 35 U.S.C. 103(a) as being unpatentable over Waytena et al (5,978,770) in view of Laval et al (6,173,209) or Lancos et al (6,873,260).

As per Claim 58.

Art Unit: 3628

Waytena et al ('770) further discloses printed numbered tickets, see column 1, lines 58-61, but does not specifically disclose that the presentation means is a printer.

Laval et al ('209) teaches the printing of passes at a kiosk, see column 3, line 61 – column 4, line 7 and Lancos et al ('260) figure 7 (708) for the benefit of providing proof of entitlement for entry.

Therefore, it would have been obvious to one of ordinary skill in the art, at the time the invention was made to provide a printer as a presentation means for the benefit of providing proof of entitlement for entry.

6. Claim 76 is rejected under 35 U.S.C. 103(a) as being unpatentable over Waytena et al (5,978,770) in view of Murashita et al (2002/0062236).

As per Claim 76.

Waytena et al ('770) does not specifically disclose the software applies a perturbation to a desirability of a first attraction of said first set of attractions, said perturbation producing a different result for said second set,

whereby directed demand to said first attraction is redistributed to mitigate at least on selected from the group consisting of underutilization or excessive demand for said first attraction and modes in which parties gather.

Murashita et al ('236) teaches providing an alternative (redistribution) to mitigate excessive demand (all seats now occupied), see figure 1e, for the benefit of redistributing diners from events with excessive demand to underutilized events.

Therefore, it would have been obvious to one of ordinary skill in the art, at the time the invention was made to provide an alternative event for the benefit of redistributing diners from events with excessive demand to underutilized events.

#### ***Allowable Subject Matter***

7. Claim 11 is allowable.

As per Claim 11.

Waytena et al ('770) further discloses the aversion attribute (age), see column 7, lines 9-31, but does not specifically disclose a nullifying preference of said party, wherein said data distinguishes a portion of said first set of attractions as being less desirable with respect to said aversion attribute unless said corresponding nullifying preference is present and wherein in step d) at least on attraction from said portion of said first set of attractions is selected for said second set of attractions.
